SUMMARY

Full Stack .NET Developer with 3+ years of professional experience building and maintaining web and desktop applications with ASP.NET Core, WinForms, and SQL Server. Comfortable across the stack — from layered back-end architecture and background services to responsive front ends — with a focus on data integrity, clean architecture, and code that's easy for the next developer to maintain.

EXPERIENCE

Full Stack .NET Developer Feb 2025 — Present
VasTek Solution · Gulberg, Lahore

- Develop and maintain desktop and web applications with .NET Core, WinForms and ASP.NET for evolving client needs.
- Build responsive interfaces with Bootstrap, HTML5, JavaScript and jQuery.
- Implement and optimise data storage and retrieval in SQL Server.
- Troubleshoot and debug across application layers for reliability.

Full Stack .NET Developer Oct 2023 — Jan 2025
Siriz Apps · Johar Town, Lahore

- Developed desktop and web applications using .NET Core, WinForms and ASP.NET, improving system functionality and performance.
- Built responsive, interactive UIs with Bootstrap, JavaScript, HTML5 and jQuery.
- Managed backend data operations in SQL Server, including stored procedures and query optimisation.
- Designed and refined application workflows across desktop and web modules.

SKILLS

Languages	C#, JavaScript	Frameworks	ASP.NET Core, ASP.NET Core MVC, ASP.NET Framework, Angular, WinForms
Data & Backend	SQL Server, MySQL, Stored Procedures, AJAX	Architecture	Repository Pattern, Service Layer, Layered/Clean Architecture, Dependency Injection
Auth & Security	Cookie Authentication, Custom Middleware, Role-based Access	Background Jobs	Hosted Services, BackgroundWorker, HttpClient
Frontend	HTML, CSS, Bootstrap, jQuery	Working style	Problem solving, communication, time management

PROJECTS

Employee Attendance System ASP.NET Core MVC · Cookie Auth · Hosted Service · SQL Server
Internal attendance system for VasTek Solution with role-based access, office-network-only middleware, an auto-checkout background service, and monthly reporting for admins.

University Server Monitor C# · WinForms · HttpClient · SQL Server
Desktop monitoring tool for Arul University's Moodle server — polls uptime every 5 minutes, raises restart-due alerts, and logs downtime incidents to SQL Server.

AMS Interview Portal

ASP.NET Core · Angular · SQL Server

Applicant management and interview scheduling portal for Arul University's admissions team, tracking candidates from application through to interview.

SSPT

.NET Core · SQL Server · Layered Architecture

Internal business system built on a layered .NET solution, with dedicated contracts, repository, service, security, Web API and Web UI projects.

WinForms Desktop Application

WinForms · C# · SQL Server

Desktop application for day-to-day business operations, connected to a live SQL Server backend.

AI Document Repository

C# · WinForms · SQL Server

Document repository with category/department filtering, expiry tracking, file versioning, and an Approve/Reject/Under-review workflow.

NOVA System

ASP.NET Core · SQL Server · Bootstrap

Multi-site enrolment and payments system — attendance scheduling, live payment summaries, and reusable vendor payment templates.

EDUCATION

BS, Information Technology

Oct 2019 — Jun 2023

Muhammad Nawaz Sharif University of Agriculture, Multan · GPA 3.1

Responsive Web Design — Certificate

March 2024
